
Final denominator spaces: 11 + 48 = 59 and 43 + 96 = 139. Ground-only continuum reaches .082.

At g=.10 and in the [.09,.10] extension, the largest numerator uses a 43D search and one retained term.

The complete hard-core residual improves the 8 × 4 ground lower. Odd levels and complete omitted tails remain in the proof.
