

Final denominator spaces: 11 + 48 = 59 and 29 + 96 = 125. Ground-only continuum reaches .082.

At isolated g=.09, the largest numerator is selected in exact dimension 43; smaller denominator totals remain 59/125.

One contribution is not a one-dimensional search. New H³ supports the .09 numerator; no filtered residual or new denominator tail is claimed.
