

Every integer cell M ≥ 2; physical L = 2M; unit designated bond; unique finite-volume ground state.

Physical Gibbs κ32 ≤ .0969, κ64 ≤ .119. One D26 trial vector; independently verified F > 1/2 branch.

37 windows + 56 finite bridges + four tails. Physical 24 retains parity/MPS48. No optimal-width or odd-physical-size claim.
