

Final denominator spaces: 11 + 48 = 59 and 29 + 96 = 125. Ground-only continuum reaches .082.

The largest numerator has dimension ≤30; 30 is not the maximum search/trial dimension across the whole .085 pipeline.

Rank one is not a one-dimensional search. These bilayer counts are not MPS bond dimensions. No moments beyond H^2 enter the .085 continuum.
